

- Version:**
- Grit, bonding, abrasive additives as well as reinforcement of the cutting discs are **optimised for maximum cutting performance and working life in their respective application areas.**
 - Bore Ø 22.2 mm (Ø 16 mm for No. 56 3500 size 100).
- Application:** For **free-hand cutting** using electric and pneumatic angle grinders with max. 80 m/s circumferential speed. Depending on the disc type for cutting steel, stainless steel, cast iron or non-ferrous metals.

Note: For stainless steel, use cutting discs at reduced speed!

Type EXTRA THIN for thinner material cross sections

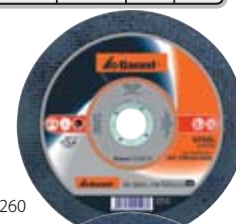

Version: Very fast cutting with low force and optimum time saving due to the thinness of the disc. **Cleanly cut surfaces, little burring,** very high operator safety. On older angle grinders please ensure discs are precisely centred!

56 3260 – **Specification: A46S-BF**, special type for steel with longest working life.

56 3270 – **Specification: A46R-BF**, for stainless steel and steel.
