Fiber Optic Termination Kits and More!

To Most People It's Just a Backshell

To Glenair It's a Promise

Most customers have a simple expectation when they go shopping for safety-critical interconnect components: They want fast and accurate service. Glenair addresses this most basic customer requirement in several different ways. First and foremost, by providing immediate access to our technical information and product documentation: whether you prefer an office visit, the telephone, the Internet, a CD or a printed catalog, Glenair is ready with answers to your most complex questions and design challenges. Secondly, Glenair stocks thousands of popular catalog products for those

situations when even a two or three week lead-time is just too long. We stock over 65,000 interconnect components—bagged and tagged and ready for immediate shipment. And for those situations when a customized solution is required, our engineers are fully versed in all aspects of interconnect system design: from shielding against EMI, to reducing weight and connector package size, to stopping corrosion and other forms of environmental damage.

You have a simple expectation: fast and accurate service. At Glenair, we're ready to give you exactly that. It's a promise.

Glendale, California 91201-2497

Telephone: 818-247-6000 · Facsimilie: 818-500-9912 · EMail: sales@glenair.com

The world's broadest selection of interconnect products—in stock and ready for immediate same-day shipment

Series ITS Reverse Bayonet Power and Signal Connectors

Over 200 MIL-C-5015 power and signal insert arrangements: AWG #18 to #4/0. Ruggedized reverse bayonet coupling. VG95234 qualification. Ideal for rail, mass transit and military vehicles.

Micro-D Twistpin Connectors and Accessories

Glenair offers both Military Standard 83513 Micro-D connectors as well as COTS selections, backshells, mounting hardware and more. Our TwistPin contact provides superior performance.

Series 89 Nanominiature Connectors

MIL-DTL-32139 and Glenair commercial equivalent .025 inch contact spacing ultra-miniature interconnects used in mission-critical applications such as: UAV's, satellites, missile systems and geophysical instruments.

Fiber Optic Interconnect Solutions

Tactical fiber optic connectors, cables, and termini for airframe, shipboard, and military ground vehicles. Catalog features Glenair's innovative high-density (GHD) connector system for reduced size and weight applications.

Available now: Glenair's Interconnect Product Guide CD, featuring our entire library of Glenair catalogs and data sheets.

In addition to over a dozen product line catalogs, the CD includes a powerful part number development program that takes all the pain and confusion out of ordering interconnect components. An easy-to-use inventory search program provides ready access to 60,000 MIL-STD and commercial part numbers.

Composite Thermoplastic Interconnect Solutions

Glenair is the world's leading manufacturer of composite interconnect solutions. We are the 'go-to' supplier for advanced composite technologies for commercial and military interconnect applications.

Composite Thermoplastic Connectors, Backshells, Accessories and Enclosures

Military Standard Connector Accessories

If the MS connector accessory you need isn't in here – it doesn't exist. Search this easy-to-use catalog by accessory type or Mil-Spec slash number, then place your order against Glenair's 60,000 part number same-day inventory.

Series 80 "Mighty Mouse" Connectors and Cables

Glenair's connector series that reduces interconnect system size and weight by 50% compared to standard MIL-DTL-38999 connectors. Now used on hundreds of mission-critical military and commercial applications.

Stop Toolin' Around

Finding the right tool for the job just got a little bit easier

Nobody can grasp the ins-and-outs of interconnect tool design and manufacturing without a full understanding of cable harness assembly.

At Glenair, we not only manufacture the connectors, backshells, cables and enclosures which go into interconnect cable harnesses, we run a top-flight cable assembly service of our own. And we've drawn on this extensive experience to design and build

a complete family of specialized backshell assembly tools for most Mil-Standard circular connectors, as well as connector wrenches, mini-strap wrenches, universal connector holding tools and braid termination tools for production use and field maintenance.

Glenair is also now offering a broad range of fiber optic termination tools, including complete kits for both our Mil-T-29504 and front-release COTS termini.

Introduction: Backshell to Connector Assembly Tools

Glenair Tools Help Prevent False Tightening and Distortion

Backshell tightening tools designed by Glenair provide a full 360° gripping surface on backshell coupling nuts. These innovative tools minimize the possibility of coupling nut distortion and false tightening problems when mating backshells to circular connectors.

Reliable Installation of Glenair Backshells on Circular Connectors

When used with the appropriate connector holders and torque wrenches, Glenair Backshell Assembly Tools provide the user with consistent, repeatable backshell installations. Designed primarily for production assembly use, the tools can also be used equally well for successful field maintenance operations.

Glenair Backshell Assembly Tools may also be utilized effectively with backshell rotatable couplers produced by other manufacturers. Consult the Glenair Backshell Assembly Tools, Banding Tools and Accessories catalog for details.

Wide Variety of Glenair Tools for Proper Backshell Installation

Glenair offers a variety of tools to accomplish proper tightening. Our 600 Series pliers with replaceable pads are configured to make maximum circumferential support to each specific size backshell to be tightened, and our TG70 strap wrench is intended for general use on any diameter between .50 to 3.00 inches. Hand-held and bench-mount torque wrenches accommodate our 600-005 plug or receptacle connector holders.

When tightening a backshell onto a connector, it is important to follow Glenair's recommended procedures for each tool being used. Our Backshell Assembly Tools, Banding Tools and Accessories catalog shows torque values for each specific connector series the backshell is being fastened onto. The recommended values are based on several factors, primarily the connector and backshell thread strengths. Torque values consider additional factors such as plug-to-receptacle alignment key strength, barrel hoop strength and material strength.

Glenair offers torque wrenches in three configurations. The hand-held torque wrench pictured above (top left), and the bench-mounted version (top center) are adjustable to a desired torque level of 20 to 360 inch pounds, and feature a 3/8" drive. A digital model (30-350 in/lbs) features LEDs, audible alarm, and user programmable pre-sets. A bench mount stand is available. A full range of receptacle and plug holders for Mil-Spec connectors and backshells is also offered as well as circular connector backshell assembly and composite hex coupling wrenches, strap wrenches, and soft-jaw pliers.

When tightening backshells with rotatable coupling nuts, Glenair recommends the backshell be hand tightened to engage the connector's interlocking teeth or spline features, making sure the teeth are fully engaged before fully torquing with our tools.

We suggest retorquing by removing the tool and reinstalling the tool approximately 90° away from the initial position and tightening to the recommended value. When applying torque with our TG70 strap wrench, allow for a slight torque variance between the Glenair torque wrench and the offset socket drive on the strap wrench. A strap wrench torque variance chart is provided on page 12 of this catalog.

Introduction: Backshell to Connector Assembly Tools

Glenair's selection of circular backshell assembly wrenches include round wrenches in all standard sizes that are designed to be employed with Glenair's handheld or bench-mounted torque wrenches. The round design assures even distribution of pressure around the backshell, thereby preventing false tightening and distortion problems. A hex design for Glenair composite coupling applications is offered. Strap wrenches, soft-jaw pliers and connector wrenches for a full range of Mil-Spec applications are available.

Glenair offers a full range of connector backshell assembly tools to serve virtually all Mil-Spec connectors and backshell accessories. The specially-designed round wrenches prevent false tightening and distortion problems by assuring even distribution of forces throughout the circumference of the backshell and connector.

Glenair's TG80 Tool Kit is designed for field use with circular electrical connectors. The products included with this kit fit most connectors covered by Military Specifications, and are used for holding during assembly and disassembly of rear clamp and adapter hardware, and to facilitate connector field repairs and servicing.

Contained in a rugged, compact foam-padded metal case, the kit includes two TG70 Strap Wrenches, a pair of TG69 Soft Jaw Pliers, a set of parallel jaw pliers and instructions.

Glenair also offers a selection of tool kits per MIL-T-83507. Details are available by contacting the factory, your local Glenair representative, or your local Glenair sales and engineering office.

BAND-IT® Pneumatic Banding Tools are offered in two designs, each of which can be enhanced by Band-It's optional foot pedal kit to free both of the operator's hands to help assure more accurate, reliable and faster shield terminations. The Standard Tie-Dex II® Pneumatic Banding Tool accommodates standard clamping bands in a tension range from 100-180 lbs. The Tie-Dex II® Pneumatic Banding Tool accommodates micro banding clamps in a tension range of 50 to 80 lbs. Each lightweight tool weighs only 2.52 lbs. (91.14 Kg); the control boxes weigh only 2.74 lbs. (1.24 Kg) each.

Fast, Cost-Effective Field and Factory Terminations

The *BAND-IT*® clamping system provides quick and highly reliable termination of braided metallic shielding or fabric braid. Banding technology was first introduced in our industry in 1985 as a solution to the field repair of magnaformed shield terminations on installed cable assemblies for the B-1 bomber. Banding has been a staple of the industry ever since.

Reliable termination is quickly and easily accomplished in the field with Band-It® precalibrated pocket-sized hand tools. High-speed, mass termination production is afforded by the pneumatic clamping tool.

Reliable RFI/EMI/EMP Terminations

The unique low profile and smooth inside diameter of the one-piece type 304 austenitic stainless steel clamping band virtually eliminates RFI/EMI/EMP leakage paths. The lock maintains constant tension under extreme environmental conditions. *BAND-IT*® has passed severe shock, vibration and thermal cycle testing with negligible deterioration of shell conductivity.

Single Piece Band Construction

No welding, soldering, magna forming, and no crimping! The clamping bands provide quick, easy and cost-effective shielding terminations. (Note: Bands must be double coiled.)

Clamp Small Diameters Easily, Reliably

Double-wrapped, the clamping band is designed to clamp small diameters as easily, quickly and reliably as large diameters.

BAND-IT® clamping bands are precision constructed of 300 Series SST/Passivate, and designed for use with the Band-It® Hand Banding Tool or the Pneumatic Banding Tool. The bands are offered in the following four configurations to suit a wide range of requirements: Double-wrapped Standard Band accommodates diameters up to 1.8 inches. Double-wrapped Extended Length Standard Band accommodates diameters up to 2.5 inches (63.5mm). The double-wrapped Micro Band accommodates diameters up to .88 inches (22.5mm). The double-wrapped Extended Length Micro Band accommodates diameters to 1.88 inches (47.8mm). All BAND-IT® clamping bands may be ordered flat or precoiled in bagged and tagged quantities from 1 to 100.

Quick, Easy Field Terminations with the Precalibrated Hand Tool

The precalibrated hand tool is lightweight and pocket-sized, affording fast braided RFI/EMI/EMP shield termination in the field.

Pneumatic Banding Tool for High-Speed Mass Production

The pneumatic clamping tool offers the capability to tackle high volume braided shielding terminations quickly and easily.

Glenair Assembly Tools Help Prevent Distortion and False Tightening Problems

Backshell tightening tools are available which provide virtually a full 360° gripping surface on backshell coupling nuts. These innovative tools minimize the possibility of coupling nut distortion and false tightening problems which can be caused by soft-jaw pliers or strap wrenches.

Reliable Installation of Glenair Backshells on Circular Connectors

When used with the appropriate connector holders and torque wrenches, Glenair Backshell Assembly Tools provide the user with consistent,

Introduction: **EMI Shield Termination Tools**

The BAND-IT® System

repeatable backshell installations. Designed primarily for production assembly use, the tools can also be used equally well for successful field maintenance operations.

Glenair Backshell Assembly Tools may also be utilized effectively with backshell rotatable couplers produced by other manufacturers, providing the "B" reference diameters are consistent with those shown within this catalog.

Recommended Connector-to-Backshell **Tightening Procedures**

Recommended tightening procedures, tools and torque values offered by Glenair are intended as an aid to properly fasten the backshell to the connector interface threads.

Glenair offers a variety of tools to accomplish proper tightening; our 600 Series pliers with replaceable pads are configured to make maximum circumferential support to each specific size backshell to be tightened, our TG70 strap wrench (page 12) is intended for general use on any diameter between .50 to 3.00 inches. Hand-held and bench-mount torque wrenches accomodate our 600-005 plug or receptacle connector holders.

When tightening backshell onto connectors, it is important to follow Glenair's recommended procedures for each tool being used.

When tightening backshells with rotatable coupling nuts. Glenair recommends the backshell to be hand tightened to engage the connectors interlocking teeth or spline features, making sure the teeth are fully engaged before fully torquing with our tools. We also suggest retorquing by removing the tool and reinstalling the tool approximately 90° away from the intial position and tightening to the connector manufacturer's recommended value.

Composite backshells should be tightened with 600-079/157 hex pliers to the values shown for MIL-C-85049 light and medium duty torque. Secondary components such as: Glenair's cable clamps, gland sealing nuts, sleeves or adapters, not directly fastened to the connector should be tightened 40 to 60 inch pounds to insure proper performance.

Four Easy Steps for Proper Backshell Assembly

1. Select plug or receptacle holder (most holder series provide "universal polarization", but a few connector series require specific polarization for each alternate keying arrangement).

- Set desired torque on torque wrench.
- 3. Mount holder on square drive of torque wrench. Carefully mate with connector, and hand-tighten Glenair backshell coupling. To assure proper mating, anti-rotation teeth must be fully engaged.
- 4. Tighten rotatable coupler with assembly tool. Do not use excessive grip on handles. When coupler begins to tighten, relax grip and rotate assembly tool back 90°, then resume grip and continue to tighten; repeating this sequence until desired torque level is reached.

CAUTION: Do not apply torque in excess of signal setting. Excess torque will cause signal pointer to reset and give erroneous readings.

Setting Torque Levels

To verify proper backshell installation values, electrical signals are built into bench-mounted (audio) and hand-held (light) torque wrenches. The procedure for setting torque levels is the same for both units.

Setting Desired Torque for Right-Hand **Thread Tightening:**

To set torque, turn Bezel (1) clockwise until signal is on. Continue to turn Bezel until Main Pointer (2) is at desired torque level on scale. You may cover the audio signal during this procedure to minimize noise level when setting the bench-mounted unit.

The Memory Pointer (3) is set by the above procedure. With this accomplished, turn Bezel counterclockwise until the Main Pointer is aligned with zero on the scale. Your torque wrench is now ready for operation.

Setting Desired Torque for Left-Handed Thread Tightening:

Simply reverse the above procedure for setting the desired torque for left-hand thread tightening.

Resetting the Memory Pointer:

When you wish to change torque levels, rotate the Bezel counter-clockwise until the signal is on. Continue to rotate Bezel until Memory Pointer is aligned with zero on the scale. now repeat the above procedure for setting torque.

See Page 15 for Digital Torque Wrench Information

Interconnect Tooling Terms and Definitions

Barrel

(1) Conductor Barrel - The section of the terminal, splice or contact that accommodates the stripped conductor. (2) Insulation Barrel - The section of the terminal, splice or contact that accommodates the conductor insulation.

Boot

A form placed around the wire terminations of a multiple contact connector as a protective housing or as a container for potting compound.

Braid

Flexible conductor made of a woven or braided assembly of fine wires.

Busing

The joining of two or more circuits.

Butting Dies (Bottoming Dies)

Crimping dies so designed that the nest and indentor touch at the end of the crimping cycle.

Cable Shielding Backshell

A device consisting of a backshell and cable support designed to terminate the screen (shield) of an electrical cable.

Circumferential Crimp

The type of crimp where the crimping dies completely surround a barrel resulting in symmetrical indentations in the barrel.

Closed Entry

A contact or contact cavity design in the insert or body of the connector which limits the size or position of the mating contact or printed circuit board to a predetermined dimension.

Coaxial Contact

A contact having two conducting surfaces, a center contact and a coaxially placed sleeve.

Color Coding

A system of identification of terminals, wires, and related devices.

Conductor Stop

A device on a terminal, splice, contact or tool to prevent excessive extension of the conductor barrel.

Connection

The joining of two metals by pressure without use of solder, braze, or any method requiring heat.

Contact

The conductive element in a connector which makes actual contact to transfer electrical energy.

Contact Area

The area in contact between two conductors, two contacts, or a conductor and a contact permitting the flow of electricity.

Contact Resistance

Electrical resistance of a pair of engaged contacts. Resistance may be measured in ohms or millivolt drop at a specified current over the engaged contacts.

Contact Retainer

A device either on the contact or in the insert to retain the contact in an insert or body.

Contact Size

An assigned number denoting the size of the contact engaging end.

Crimp

The physical compression (deformation) of a contact barrel around a conductor in order to make an electrical connection.

Introduction: Interconnect System Tooling Glossary

Crimping

A pressure method of mechanically securing a terminal, splice or contact to a conductor.

Crimping Dies

Portion of the crimping tool that shapes the crimp.

Crimping Tool

Depth of Crimp

The distance the indenter penetrates into the barrel.

Die Closure

The gap between indenter dies at full handle closure. Usually defined by Go/No-Go dimensions.

Full Cycle Control

Controls placed on the crimping cycle of crimping tools forcing the tool to be closed to its fullest extent completing the crimping cycle before the tool can be opened.

Head Assembly

A positioner or turret designed to attach to a crimping tool.

Indentor

The part of a crimping die, usually the moving part, which indents or compresses the contact barrel.

Insertion and Removal Tool

A device used to install or remove contacts into a connector. A device used to install or remove taper pins into taper pin receptacles.

Inspection Hole

A hole placed at one end of a barrel to permit visual inspection to see that the conductor has been inserted to the proper depth in the barrel prior to crimping.

Locator (See Stop Plate)

Device for positioning terminals, splices, or contacts into crimping dies, positioner, or turret heads.

Nest

The portion of a crimping die which supports the barrel during crimping.

Positioner

A device when attached to a crimping tool locates the contact in the correct position.

Ram

The moving portion of the head of a crimping tool.

Ratchet Control

A device to ensure the full crimping cycle of a crimping tool.

Stop Plate (See Locator)

A device used to properly locate a terminal, splice or contact in the tool prior to crimping.

Strip

To remove insulation from a conductor.

Stripper

A tool or chemical used to remove insulation material from wire or cable.

Tensile Test

A controlled pull test on the crimp joint to determine its mechanical strength.

Wire Gauge

The sizes of conductors accommodated by a particular barrel. Also the diameters of wires accommodated by a sealing grommet.

Work Curve

A graph which plots the pull out force, indent force and relative conductivity of a crimp joint as a function of various depths of crimping.

600-006, 600-079 & 600-102 Circular Backshell Assembly Wrenches and Repacement Insert Pads

Consult Factory for Larger Sizes

Replacement Insert Pads

Fits standard coupling series sizes 08 through 24, color black.

600-078-01 Fits anti-decoupling coupling sizes 09 through 23, color red.

600-078-02 Fits anti-decoupling coupling size 25, color red

Replacing Insert Pads in Backshell Assembly Tools

- The urethane pad strips are mechanically retained without adhesive. To remove, grasp an edge of the strip and pull loose from tool.
- Beginning with retaining hole adjacent to assembly tool hinge, insert first retaining knob on strip into hole. Continue inserting knobs on pad strip into remaining holes on tool.
- Using side-cutters or scissors, trim end of pad strip flush with metal surface of assembly tool. Retain remainder of strip for replacement in other size assembly tools.

APPLICATION NOTES

- 1. This backshell assembly tool is designed for Glenair composite hex coupling applications and should be used in conjunction with Glenair torque wrenches (see page 14).
- 2. These wrenches are made of stainless steel with vinyl grips.
- 3. Metric dimensions (mm) are indicated in parentheses.

TG70 Strap Wrench

Strap Length in Inches (See Notes2 and 4)
Lengths Available: 12, 18, 24 and 36-Inch Only
Standard length is 12 Inches,
Omit Dash Number for Standard

APPLICATION NOTES

- These wrenches are made of the following materials: Wrench Handle - Aluminum Alloy/Nickel Plate. Wedge - Stainless Steel/Passivated. Strap - Impregnated Fabric. Straps are 1/2 inch (12.7) in width.
- 2. Replacement straps are available. Specify part number G70515-xx for 12, 18, 24 or 36-inch strap. 24 and 36 inch for double wrap.
- 3. Metric dimensions (mm) are indicated in parentheses.
- 4. Double wrap as shown for heavy duty range.
- 5. Not recommended for composite coupling nuts (use 600-091 or 600-157).

| | | | | | |

* TG70 Not Recommended For Values of 120 Inch Lbs. or Greater.

VARIANCE CHART NOTES

- Recommended installation torque is approximately 80% of MIL-C-85049 accessory thread strength values.
- 2. Heavy duty installation torque values may be difficult to attain with the TG70 Strap Wrench; the values shown in brackets [] are the maximum attainable with the TG70 Strap Wrench using a single wrap.
- Glenair recommends using 600 series torque tools whenever possible. When torque loading exceeds 75 inch pounds, or to attain the heavy duty torque values shown, a double wrap strap provides suitable friction to achieve torque values.
- Glenair recomends that heavy duty torque values be directly read through the connector shell body with the use of 600-005 connectors holding tools.

TG69 Soft Jaw Pliers, TG80 Tool Kit and TG82 Strap Wrench

TG82

Strap Wrench
2.50 (63.5) Max Capacity
(1/4 Drive)
Note: The replacement
strap part number is
G62748-11.

Consult factory for other lengths.

7.0 (177.8) Approx.

7/16 (11.1)

NOTE: Not recommended for composite coupling nuts (use 600-091 or 600-157)

TG69 Soft Jaw Pliers

NOTE: Not recommended for composite coupling nuts (use 600-091 or 600-157)

TG80 Tool Kit

The TG80 Tool Kit is designed for field use with circular electrical connectors. The products included with this kit fit most connectors covered by Military Specifications, and are used for holding during assembly and disassembly of rear clamp and adapter hardware, and to facilitate connector field repairs and servicing.

Kit includes 2 TG70 Strap Wrenches, a pair of TG69 Soft Jaw Pliers, a set of parallel jaw pliers and instructions.

Also available: Tool kits per MIL-T-83507. Please consult factory for ordering information.

600-004, 600-007, 600-076 and 600-077 Torque Wrenches

Hand-Held Torque Wrench

3/8" Drive

Requires two Panasonic SR44W or equivalent batteries

600-076 High Torque

Adjustable to desired torque level of 20 to 360 inch pounds

600-004 Standard Torque

0 - 150 lb./in. (Not Shown)

Bench-Mounted Torque Wrench

3/8" Drive

Require two Panasonic SR44W or equivalent batteries

600-077 High Torque

Adjustable to desired torque level of 20 to 360 inch pounds

600-007 Standard Torque

0 - 150 lb./in. (Not Shown)

Metric dimensions (mm) shown in parentheses.

600-161 Digital Torque Wrench and 600-162 Bench Stand

DIGITAL TORQUE WRENCH AND BENCH STAND

Torque Wrench 600-161

Digital Readout For Improved Accuracy

The Glenair Dual Drive Digital Torque Wrench (600-161) features a dual sided drive head for hand or bench mount use. Features an ergonomic handle with built-in digital readout display. Available torque units include: Ft-lb, Nm, Kg-Cm, or In-lb. Peak and Track modes available. Data collection via supplied USB and software provides quality departments the ability to track and record individual torque values.

- 1. Use in conjunction with glenair connector and backshell tools
- 2. Torque range: 15-300 in/lbs; digital graduations 1/10 ln/lb;
- 3. Accuracy: $cw/ccw \pm 2\%$ of reading 10% to 100% of full scale
- 4. replacement battery: AA x 2

- USB cable, datatracking software, AC adapter, and 3/8" to 1/4" drive adapter included
- 6. weight: 1.45 Lb, w/case 2.28 Lb

Bench Stand 600-162

Horizontal Bench Stand

Constructed from aluminum the bench mount (600-162) features five position tilt settings.

I. Use in conjunction with glenair 600-161 digital torque wrench

Series 80 "Mighty Mouse" Jam Nut Spanner and Connector Holding Tools

Spanner Tool for Tightening Series 80 Jam Nuts

Use these tools to tighten Series 80 jam nuts. 1/4" or 3/8" square drive for use with torque wrenches. Heat-treated steel, nickel plated.

APPLICATION NOTES

- 1. Hex accommodates Coupling Nut with size shown.
- 2. Square accommodates Standard Square Socket Tools for Composite Coupling Nut.
- 3. Metric Dimensions (mm) are indicated in parentheses.
- 4. Newton-Meters [nm] are indicated in brackets.
- Actual torque to part is affected by D offset. Apply approximately 35 Inch Lbs [4] to achieve 40 Inch Lbs [4.5];
 Inch Lbs [8] for 80 Inch Lbs [9]; and 100 Inch Lbs [13] for 120 Inch Lbs [13.5] recommended torque to parts.

The BAND-IT® Clamping System

Fast, Cost-Effective Shielding Termination

The BAND-IT® clamping system provides quick, easy, cost-effective and highly reliable termination of braided metallic shielding or fabric braid. Combined with Glenair's vast selection of connector accessories, braided shielding, cable, convoluted tubing, flexible metal core conduit, adapters, transitions, Geo-Marine® and special connectors, you have everything needed to design and build complete cable assemblies, wire harnesses and conduit systems.

Manual Hand Tool

Reliable RFI/EMI/EMP Terminations

The unique low profile and smooth inside diameter of the one-piece type 304 austenitic stainless steel clamping band virtually eliminates RFI/EMI/EMP leakage paths. The lock maintains constant tension under extreme environmental conditions. *BAND-IT*® has passed severe shock, vibration and thermal cycle testing with negligible deterioration of shell conductivity.

Single Piece Band Construction

No welding, soldering, magna forming, and no crimping! The clamping bands provide quick, easy and cost-effective shielding terminations. (Note: Bands must be double-coiled.)

Pneumatic Clamping Tool

Clamp Small Diameters Easily, Reliably

Double-wrapped, the clamping band is designed to clamp small diameters as easily, quickly and reliably as large diameters.

Bands - Available Flat or Precoiled

Quick, Easy Field Terminations with the Precalibrated Hand Tool

The precalibrated hand tool is lightweight and pocket-sized, affording fast braided RFI/EMI/EMP shield termination in the field.

Pneumatic Banding Tool for High-Speed Mass Production

The pneumatic clamping tool offers the capability to tackle high volume braided shielding terminations quickly and easily.

Completed Termination

600-052, 600-090, 600-057, 600-083 600-052-1, 600-090-1, 600-057-1 & 600-083-1 Clamping Bands

Standard Band 600-052 and Precoiled Standard Band 600-052-1

The 600-052 Standard Band is precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700 and designed for use with the 600-058 Hand Banding Tool or the 600-067 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately 1.8 inches (45.7). Bands may be ordered flat (600-052) or precoiled (600-052-1). Bands come bagged and tagged in quantities from 1 to 100.

Reference: BAND-IT® part number A10086

Extended-Length Standard Band 600-090 & Precoiled Extended-Length Standard Band 600-090-1

The 600-090 Extended Length Standard Band is precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700, and designed for use with the 600-058 Hand Banding Tool or the 600-067 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately 2.5 inches (63.5). Bands may be ordered flat (600-090), or precoiled (600-090-1). Bands come bagged and tagged in quantities from 1 to 100.

Reference: BAND-IT® part number A11086

Micro-Band 600-057 Precoiled Micro-Band 600-057-1

The 600-057 Micro Band is precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700, and designed for use with the 600-061 Hand Banding Tool or the 600-068 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately .88 inches (22.4). Bands may be ordered flat (600-057), or precoiled (600-057-1). Bands come bagged and tagged in quantities from 1 to 100.

Reference: BAND-IT® part number A31186

Extended Length Micro-Band 600-083 Precoiled Micro-Band 600-083-1

The 600-083 Extended Length Micro-Band is precision constructed of 300 Series SST/Passivate I.A.W. AMS 2700, and designed for use with the 600-061 Hand Banding Tool or the 600-068 Pneumatic Banding Tool. Double-wrapped bands will accommodate diameters up to approximately 1.88 inches (47.8). Bands may be ordered flat (600-083), or precoiled (600-083-1). Bands come bagged and tagged in quantities from 1 to 100.

Reference: BAND-IT® part number A31086.

Metric dimensions (mm) are indicated in parentheses. Consult factory for diameters above 2.5 inches (63.5).

600-058 and 600-061 Hand Banding Tools

Hand Banding Tool 600-058

The 600-058 Hand Banding Tool weighs 1.18 lbs., and is designed for standard clamping bands 600-052 and 600-090 (see page 36) in a tension range from 100 to 180 lbs. Calibrate at 150 lbs. ± 5 lbs. For most shield terminations. Tool and band should never be lubricated.

Reference: BAND-IT® part number A40199.

Hand Micro Banding Tool 600-061

The 600-061 Hand Micro Banding Tool weighs 1.18 lbs., and is designed for micro clamping bands 600-057 and 600-083 (see page 36) in a tension range from 50 to 85 lbs. Calibrate at 80lbs ± 5 lbs. For most shield terminations. Tool and band should never be lubricated.

Reference: BAND-IT® part number A30199.

Metric Dimensions (mm) are indicated in parentheses.

600-082, 600-056, 600-060 & 600-062 Banding Tool Replacement Parts Kits

600-082 Cutter Knife

The 600-082 Cutter Knife replaces the cutter knife on the 600-061 Hand Banding Tool, and the 600-068 Pneumatic Banding Tool. Material is heat treated steel finished with black oxide and rust preventative.

Reference: BAND-IT® part number A48087

600-060-1 Micro Cut-Off Blade Kit

The 600-060-1 Micro Cut-Off Blade Kit for Serial Numbers up to 20999 consists of the blade, two E-rings and one pin, providing all parts needed to replace the cut-off blade on the 600-061 Hand Micro Banding Tool and the 600-068 Pneumatic Micro Banding Tool. Material is heat treated steel finished with black oxide and rust preventative.

Reference: *BAND-IT*® part number A43999. 600-060-2 Ref. *BAND-IT*® P/N A47899 for Serial Numbers 21000 and above.

600-056 Cut-Off Blade Kit

The 600-056 Cut-Off Blade Kit consists of the blade, two E-rings and one pin, providing all parts needed to replace the cut-off blade on the 600-058 Hand Banding Tool and the 600-067 Pneumatic Banding Tool. Material is heat treated steel finished with black oxide and rust preventative.

Reference: BAND-IT® part number A40699.

600-062 Cutter Knife

The 600-062 Cutter Knife for Serial Numbers up to 16589 replaces the cutter knife on the 600-058 Hand Banding Tool and the 600-067 Pneumatic Banding Tool. Material is heat treated steel finished with black oxide and rust preventative.

Reference: *BAND-IT*® part number A40788. 600-062-1 for Serial Numbers 16590 and above. Reference: *BAND-IT*® part number A67787.

Metric Dimensions (mm) are indicated in parentheses.

600-067 & 600-068 Pneumatic Banding Tools

600-067 *Tie-Dex II*® Pneumatic Standard Banding Tool

The 600-067 Tie-Dex II® Standard Banding Tool accommodates standard 600-052 and 600-090 bands (see page 36) in a tension range of from 100-180 lbs. Calibrate at 150 lbs. ± 5 lbs for most shield terminations. Weight of the tool is 2.52 lbs (1.14 Kg); the control box weighs 2.74 lbs (1.24 Kg).

Reference: BAND-IT® part number A35199.

600-068 *Tie-Dex II*® Pneumatic Micro Banding Tool

The 600-068 Tie-Dex II® Pneumatic
Micro Banding Tool accommodates
600-057 and 600-083 Micro Bands
(see page 36) in a tension range of from
50 to 80 lbs. Calibrate at 75 lbs. +2 lbs. -7
lbs. for most shield terminations. Weight
of the tool is 2.52 lbs (1.14 Kg); the
control box weighs 2.74 lbs (1.24 Kg).

Reference: BAND-IT® part number A35599.

3.00 (76.2)

Pneumatic Tool

NOTE: Hoses typically can extend to approximately 10 feet (3.65 meters).

Metric Dimensions (mm) are indicated in parentheses.

600-086 & 600-072 Field Tool Kits

600-086 Tie-Dex II® Micro-Tool Kit

The 600-086 Tie-Dex II® Micro-Tool Kit contains the 600-061 Hand Micro Banding Tool, the 600-086-1 Tension Gauge, Cutters for clamp removal, 600-055 Calibration Adjustment Key, and 600-060 Replacement Parts (Cut-off Blade Kit). The tension gauge is used to calibrate tool to 80 lbs. ±2 lbs. Complete with rugged 12.00 in. x 8.75 in. x 4.00 in. (304.8 x 222.3 x 101.9mm) foam padded carrying case and operator's manual.

Reference: BAND-IT® part number A59099.

600-072 Tie-Dex II® Tool Kit

The 600-072 Tie-Dex II® Tool Kit contains the 600-058 Hand Banding Tool, the 600-072-1 Tension Gauge, Cutters for clamp removal, 600-055 Calibration Adjustment Key, and 600-056 Replacement Parts (Cut-off Blade Kit). The tension gauge is used to calibrate tool to 150 ±5 lbs. Complete with rugged 12.00 in. x 8.75 in. x 4.00 in. (304.8 x 222.3 x 101.9mm) foam padded carrying case and operator's manual.

Reference: BAND-IT® part number A49099.

Metric Dimemsions (mm) are indicated in parentheses.

600-055 Calibration Key and 600-072-1 Standard and 600-086-1 Micro Gauges

600-055 Calibration Key

The 600-055 Calibration Key is designed for use with the 600-061 and 600-058 Hand Banding Tools. Material is black anodized aluminum alloy. One full turn clockwise will advance the tension range by 25 lbs., and a counter-clockwise turn will decrease tension by the same amount. Recommended for purchase with 600-072-1 and 600-086-1.

Reference: BAND-IT® part number A44699.

600-072-1 Standard Tension Gauge

The 600-072-1 Tension Gauge is used to check and calibrate the Tie-Dex II® standard hand tool to values noted on calibration sticker. Constructed of hardened steel, the gauge's accuracy is within ±2 lbs.

Reference: BAND-IT® part number A48599.

600-086-1 Micro Tension Gauge

The 600-086-1 Micro Tension Gauge is used to check and calibrate the Tie-Dex II® micro hand tool to values noted on calibration sticker. Constructed of hardened steel, the gauge's accuracy is within ±2 lbs.

Reference: BAND-IT® part number A47599.

Metric Dimensions (mm) are indicated in parentheses.

600-074 Pneumatic Banding Tool Foot Pedal Control, and 600-065 Calibration Kit for All Banding Tools

600-074 Foot Pedal Control for 600-067 and 600-068 **Pneumatic Banding Tools**

The 600-074 Foot Pedal Control frees both hands to help assure more accurate, reliable and faster shield terminations.

Reference: BAND-IT® part number A37099.

600-065 Calibration Kit For **All Banding Tools**

The 600-065 Calibration Kit includes the (1) 600-065-3 Calibration Device, (2) Fifty 600-065-2 Micro Test Bands, (3) Fifty 600-065-1 Standard Test Bands, (4) 600-055 Calibration Key, and the (5) 600-065-4, (6) 600-065-5 and (7) 600-065-6 Mounting Bracket Kits. Range of the Calibration Device is 60 to 170 lbs, and accuracy is calibrated to ±2 lbs. at factory. Dimensions: 6.65 in. x 2.47 in. x 2.83 in. (168.9 x 62.7 x 71.9mm). Weight: 2.10 lbs. (1.0Kg).

Reference: BAND-IT® part number A50099.

Metric Dimensions (mm) are indicated in parentheses.

Backshell Shield Termination Assembly Instructions

Shield Termination Assembly Process

- 1. Prepare Cable Braid for termination process (Figure 1).
- Push Braid forward over Adapter Retention Lip to the Adapter Incline Point (or .4" [10.2mm] minimum braid length). Milk Braid as required to remove slack and insure a snug fit around the shield termination area (Figure 2).
- Prepare the Band in the following manner: IMPORTANT: Due to Connector/Adapter circumference, it may be necessary to prepare the Band around the Cable or Retention Area.
 - A. Roll Band through the Buckle Slot twice. (Bands must be double-coiled.)
 - B. Pull on Band until Mark (▷) is within approximately .250 inch (6.4mm) of Buckle Slot (Figure 3). The Band may be tightened further if desired.

NOTE: Prepared Band should have (▷|) Mark visible approximately where shown in Figure 3.

Shield Termination Clamping Process (Figures 4 thru 8)

NOTE: To free Tool Handles, move Holding Clips to center of Tool.

- Squeeze Gripper Release Lever and insert Band into the front end opening of the Tool. (NOTE: Circular portion of looped band must always face downward.)
- Aligning the Band and Tool with the Shield Termination Area, squeeze Black Pull-Up Handle repeatedly using short strokes until it locks against Tool Body. (This indicates the Band is compressed to the Tool Precalibrated Tension.)
 - NOTE: If alignment of band and shield is unsatisfactory, tension on band can be relaxed by pushing on slotted release lever on top of tool. Make adjustments as necessary and again squeeze black pull-up handle
- Complete the Clamping Process by squeezing the Gray Cut-Off Handle.
- 7. Remove excess band from tool and dispose.
- 8. Inspect Shield Termination.

IMPORTANT: Always roll band through the buckle slot twice (see Step 3). Bands must be double-coiled to function correctly. The failure to roll the band through the buckle slot twice is the most common user error in band style terminations.

600-164 Large Broad Blade Utility Shear for Cutting AmberStrand® and Braided Metal Shielding Also Cuts Rubber, Cable Jacketing, Cable, Plastics and Rope

- Nickel Chrome Plating Resists Corrosion and Rusting
- Broad, Short Jaws Provide Powerful Cutting Action
- Extended Handle Provides Comfort and Cutting Leverage
- High Leverage Provides Powerful Cutting Action for Light Metals, Rubber and Heavy Fabrics
- Cuts Rubber, Cables, Light Metal, Wire Metal Screens and Braided EMI/EMP Shielding, Cordage, Plastics and Rope
- Weight: 0.55 Pounds
- Shear Cut Length: 2.000 (51.0)

Recommended AmberStrand® Cutting Procedure

Note: When cutting braid, both metal and especially composite, open cutter blades to allow the full 2" cut. Place braid all the way back onto blades as shown.

APPLICATION NOTES

- 1. Metric dimensions (mm) are indicated in parentheses.
- 2. Always wear approved eye protection.
- 3. Never use on or near live electrical circuits.

Good Things Come In Small Packages

And at Glenair, They Ship the Same Day

Tired of long lead times for F/O connectors and contacts? Then consider the Glenair difference: We've placed our products in stock, in quantity, and ready for immediate shipment—including both our MIL-T-29504 qualified pin and socket termini as well as our unique front

release 181-011 and 181-012 designs. Consider as well Glenair's "no minimum order" policy and our lightning fast turnaround on quotes for price and delivery. At Glenair, we're committed to keeping our products, programs and services current with your every need.

Fiber Optic Assembly, Termination and Termini Polishing Tools

PRODUCT FEATURES

- Test Probe Polishing Tools
- Complete Fiber Optic Termination Kits for Field and Factory Use
- Cleaning Swabs
- Instruction Sheets
- No-Nic Strippers
- Specialty Tooling for All Termination Operations
- BAND-IT® Shield Termination System

Glenair: One Stop Shopping for all Your Fiber Optic Interconnection System Tooling Requirements

The Right Fiber Optic Tool for the Job

Fiber optic connectors are designed to be connected and disconnected many times without affecting the optical performance of the fiber circuit. Key to this performance is the error-free termination of the contact terminus to the fiber circuit—a task which requires the use of a wide range of specialized tooling. Glenair's extensive experience in building fiber optic interconnect cables has enabled us to select the right tools for each step in the termination and assembly process. Our Fiber Optic Termination and Test Probe Kits allow field technicians the convenience of completing final termination of precision termini on location for easy and efficient cable routing and installation. Each kit contains pin and socket polishing tools, jacket strippers, shears, scribes—literally all the tools and supplies required for ongoing termination and test of fiber optic systems. Polishing tools are also sold seperately for factory use or as replacement parts in field termination kits.

A History of Meeting the Industries Interconnect Tooling Requirements

Glenair manufactures many of the specialty tools used in high-reliability interconnect harness assembly. And we are distributors for a wide range of tooling from the industry's other leading suppliers. In addition to our own line of banding tools and connector/backshell assembly tools, Glenair is able to supply custom tool kits and workstations for a broad range of interconnect applications and working environments. We offer custom tool labeling and packaging and same day availability on both individual tool part numbers as well as kits. For more information please consult the factory or visit us at www.glenair.com.

The BAND-IT® Shield Termination System

The *BAND-IT*® Clamping System provides quick, easy and highly-reliable termination of braided shielding or fabric braid. Glenair has designed banding platforms into a number of our specialized fiber optic backshells and conduit adapters. Individual clamping tools, bands and kits are available.

187-017 Glenair Fiber Optic Termination Kit for MIL-PRF-29504/4 & /5 Termini (181-001 & 002)

- Turn-Key Termination of MIL-PRF-29504/04 and /05 Fiber Termini
- Singlemode or Multimode
- 110 Volt or 220 Volt
- Complete Kit With All Tools, Instruments and Consumables
 - Power Meter
 - LED Source
 - 200X Microscope
 - Polishing Media
 - Curing Oven
 - Hand Tools
 - Epoxies, Wipes and Swabs

Portable "Fiber Optic Lab In A Box" for Field Termination and Repair of D38999 Optical Interconnects

Our termination kit allows field technicians the convenience of on-site optical fiber termination. Each kit contains jacket strippers, polishing tools, hand tools, light source, power meter and microscope as well as a full complement of consumables including epoxy, polishing media, swabs and adhesives.

187-017 Glenair Fiber Optic Termination Kit for MIL-PRF-29504/4 & /5 Termini (181-001 & 002)

FOR USE WITH GLENAIR MIL-PRF-29504/4 & /5 (181-001 & 002) TERMINI

NOTE: Parts list shown for reference only and may change due to part availability.

| | PARTS LIST | |
|-------------|--|----------|
| Item No. | Part Description | Quantity |
| 1 | Terminus Procedure (Laminated) | 1 |
| 2 | Pin Termini for 62.5/125 Fiber (181-002-126) | 10 |
| 3 | Socket Termini for 62.5/125 Fiber (181-001-126) | 10 |

- 3. Material/Finish: Stainless steel/passivated.

187-024 Cleaning Swab for Glenair Fiber Optic Termini

Glenair has developed this cleaning swab which allows the cleaning of recessed difficult-to-clean socket termini.

The swab's foam tip is the perfect size to clean both the alignment sleeve and the glass core area of the fiber.

Glenair Recommends the Following Procedure for Cleaning Glenair Fiber Optic Termini:

- **1.** Remove loose contamination with a dry swab.
- **2.** Blow pressurized, filtered air (or instrument grade canned air) onto terminus end face.
- 3. Inspect end face using 10X magnification minumum.
- **4.** If contamination is still present, take the following measures:
 - A. Soak swab foam tip with 99%+ pure alcohol.
 - **B.** Wipe the wet swab across the terminus end face.
 - **C.** Wipe a dry swab across the terminus end face immediately to guard against potential air-dried alcohol film residue.

GBS1000 and GBS1001 Portable Fiber Optic Video Bore Scope Inspection System

- Field/Bench Use System Includes Video Display Unit, Inspection Camera and Standard 2.5 mm & 1.25 mm Patchcord Inspection Tips
- Tips available Use with all Common F/O Connector Types: SC, LC, ST, and FC p/us Mil-Dtl-38999 and Small Form Factor Connectors
- 200X and 400X Magnification
- Built-in NiMH Rechargeable Battery with Automatic Shut-off Function
- Rugged Watertight Case

NOTE: Consult factory for D38999, M28876 and other military/ruggedized connector types.

Glenair Video Inspection System Provides The Ultimate Solution to Field Maintenance of Fiber Optic Systems

Dirty or contaminated fiber optic contacts (termini) can seriously degrade the performance of a fiber optic system. But inspecting individual contacts in complex connector devices such as bulkhead feed-throughs and multi-channel Mil-Spec connectors can be a difficult and time-consuming task. The Glenair video inspection system supplies everything you need to quickly and conveniently inspect and clean butt-jointed fiber optic contacts. Optional add-ons enable turnkey integration with computer desktops, digital cameras and powerful optical test software.

GBS1000 and GBS1001 Portable Fiber Optic Video Bore Scope Inspection System

| GBS1000 SPECIFICATIONS | | | | | |
|------------------------|------------------------------|--|--|--|--|
| Dimensions | 1.8" W x 1.7" H x 5.5" L | | | | |
| Weight | 4.08 oz / 115.6 gms | | | | |
| Video Output | NTSC or PAL | | | | |
| Light Source | Blue LED 1000,000+ hour life | | | | |
| Lighting Technique | Coaxial | | | | |

| Camera type | .33" CCD | | | | |

| GBS1001 SPECIFICATIONS | | | | | | |
|--|--------|--|--|--|--|--|
| Weight .11 Kg / .25 lb | | | | | | |
| Resolution Better than 1.5 Microns | | | | | | |
| Cable Integrated USB 2.0 coil cable 2.5' relaxed, 10.5' fully extended | | | | | | |
| Certification CE | | | | | | |
| Warranty | 1 year | | | | | |

GBS1001 Inspection Probe with USB Adapter and Fiber Chek 2 Software*

Basic Part Number Includes:

- Inspection Probe with USB Adapter
- Fiber Chek 2 Software

The GBS1001 is the only inspection probe today with a high resolution, all digital sensor and USB2 video stream which delivers high-resolution uncompressed images directly to your personal computer.

Fiber Chek Software Fiber Optic Analysis Program*

Fiber Chek is an integrated hardware/software package engineered with the single purpose of critically and consistently grading fiber end-faces. Works hand in hand with the Quick Capture Analog Probe for visual inspection, taking pictures and testing fibers.

- Automatic debris and defect detection, including fine scratches
- Measures epoxy ring for out-of-tolerance conditions
- Inspection results, including image data, can be printed or archived
- Utilizes industry standards or user defined threshold settings

*Fiber Chek software can be downloaded from http://www.westoverfiber.com.

APPLICATION NOTES

- Glenair's handheld Bore Scope is a small, lightweight video microscope used to examine fiber optic end-faces. The GBS1000 displays a clear and concise live image with the ability to view fibers at either 200x or 400x magnifications.
- The Quick Capture GBS1000-U USB Module can be added to the GBS1000. This valuable item allows the user to inspect and capture fiber end-faces on your PC. Works great with Fiber Chek software to inspect, test and capture images. To order separately, use part number GMP-002.
- The dual magnification mode inherent in all Fiber Chek 2
 platforms provides a large, easily centered image during
 handheld focusing. This greatly simplifies your ability to
 achieve a quality image. A high-magnification image is
 acquired, analyzed, and graded.
- Fiber Chek 2 software can analyze several zones of the fiber end-face.

GCB1000, GCB2000 and GCB3000 Fiber Optic CleanBlast® Cleaning Systems for Fiber Optic Connectors

Complete CleanBlast® Inspection System

(With Monitor)

GCB1000-U

Basic Part Number - Includes:

- Portable CleanBlast® with LCD Monitor and Inspection
 Probe in Ruggedized
- 2.5 mm and 1.25 mm
 Patch Cord Inspection Tips
- Universal 2.5 mm Bulkhead Cleaning Tip
- · Glenair Swabs

Optional Quick Capture — Analog Probe with 6 Pin to 4 Pin Converter (Omit for None)

Faster, More Effective and Less Costly than using Swabs or other Cleaning Methods

- Excellent at Removing-Instead of Spreading-Debris and Oils around the Ferrule Surface
- Complete Selection of Tips Available
- Cost per Cleaning Cycle: One Cent!
- Rugged Watertight Case
- Optional Add-Ons for PC Optical Testing of MIL-PRF-29504
 Termini with Quick Capture Analog Probe (6-4 pin Converter)
 and FiberChek Software.

CleanBlast® Basic Kit

(Without Monitor)

GCB2000

Basic Part Number - Includes:

- Portable CleanBlast®
- Glenair Swabs

Laboratory Bench Model

GCB3000-M

Basic Part Number - Includes:

- Universal 2.5 mm Bulkhead Cleaning Tip
- · Glenair Swabs

Optional Digital Mounting

Monitor with Inspection Probe
and 2.5 mm & 1.25 mm Patch
Cord Inspection Tips

GTK1000 Glenair Fiber Optic Testing Kit for Front Release 181-011 & -012 Termini

Custom test kits available upon request; consult factory for unique part number.

APPLICATION NOTES

- Traditional optical test harnesses are expensive and easily contaminated in normal use. Glenair's test probe, in conjunction with our precise-mating test adapter, offers a complete solution to optical test and measurement. The GTK-1000 comes with a power meter, source meter, test probes and a test probe calibrator.
- For accurate results, the test probe calibrator will "zero out" your meters.
- Glenair's patented test probe design provides less than 1.0 dB insertion loss, are used with test probe adapters and a calibration feedthrough, and accommodates all standard fiber sizes and several connection options.

Glenair Earth Bonding System Introduction **Overall Features and Performance**

The easy to use, reliable earth bond system

Drill, Insert, Expand, Connect

- Lightweight hydraulic setting tool.
- Requires no welding, impacting, cleaning or surface preparation.
- Quality repeatable termination even to uneven and curved surfaces.
- Consistent connection providing low electrical resistance.
- Bond is installed from one side only.
- Available for aluminium and steel plates from 1.5mm thick and upwards.
- High strength joint.

Glenair Earth Bonding System Typical Performance Values

Principle of the Earth Bond

Electrical Performance: Aluminium Plate

| Part Number | 80958 – M6 | 80959 - M10 | 80960 – M6 | 80961-M10 |
|--|---------------------------|---------------------------|---------------------------|---------------------------|
| Electrical resistance measured at a point between the terminal lug (copper tin plated) and the aluminium plate | 60 micro ohms T = 2 mm | 50 micro ohms T = 2 mm | 60 micro ohms T = 4 mm | 20 micro ohms T = 4 mm |
| Withstand short circuit test – 3 passes of high intensity current with no degradation of the connection | 10 Ka | 20 Ka | 10 Ka | 20 Ka |
| Corrosion Test: 500 hours | 90 micro ohms T = 2 mm | 50 micro ohms T = 4 mm | - | - |

T = Plate Thickness

Mechanical Performance: Aluminium Plate

| Part Number | 80958-M6 | 80959-M10 | 80960-M6 | 80961-M10 |
|--|-------------|-----------|-----------|-----------|
| Tensile force applied to the dowel or threaded stud | 250 daN | 200 daN | 300 daN | 500 daN |
| to remove earth bond from the plate | T = 2 mm | T = 2 mm | T = 4 mm | T= 4 mm |
| Bending moment (IEC60068-2-21). Force applied | 34 daN | 100 daN | 200 daN | 300 daN |
| at a point 5 mm from the end of the thread | T = 1.5 mm | T = 2 mm | T = 4 mm | T = 4 mm |
| Pressure Seal: Pressure applied to both sides of bond for 2 hours with no leak between bush and plate | 6 Bar | 6 Bar | 6 Bar | 6 Bar |

T = Plate Thickness

Mechanical Performance: Steel + Stainless Steel Plate

| Part Number | 80923-M6 | 80924-M10 | 80925-M6 | 80926-M10 |
|--|----------------------------|---------------------------|---------------------------|---------------------------|
| Electrical resistance measured at a point between the terminal lug (copper tin plated) and the steel plate | 25 micro ohms T = 2 mm | 20 micro ohms T = 2 mm | 25 micro ohms T = 4 mm | 20 micro ohms T = 4 mm |
| Electrical resistance measured at a point between the terminal lug (copper tin plated) and the stainless steel plate | 120 micro ohms T = 2 mm | 70 micro ohms T = 2 mm | 75 micro ohms T = 4 mm | 60 micro ohms T = 4 mm |
| With stand short circuit test-3 passes of high intensity current with no degradation of the connection. | 10 Ka | 15 Ka | 10 Ka | 20 Ka |
| Corrosion test: 500 hours: 2 mm steel plate | 30 micro ohms | 25 micro ohms | - | - |
| On 2 mm stainless steel plate | 150 micro ohms | 90 micro ohms | - | - |

T = Plate Thickness

Mechanical Performance: Steel + Stainless Steel Plate

| Part Number | 80923-M6 | 80924-M10 | 80925-M6 | 80926-M10 |
|---|-------------|-----------|-----------|-----------|
| Tensile force applied to the dowel or threaded | 400 daN | 500 daN | 500 daN | 800 daN |
| stud to remove earth bond from the plate | = 2 mm | T = 2 mm | T = 4 mm | T = 4 mm |
| Bending moment (IEC60068-2-21). Force applied | 100 daN | 190 daN | 200 daN | 330 daN |
| at a point 5 mm from the end of the thread | T = 1.5 mm | T = 2 mm | T = 4 mm | T = 4 mm |
| Pressure seal: Pressure applied to both sides of bond for 2 hours with no leak between bond and plate | 6 Bar | 6 Bar | 6 Bar | 6 Bar |

T = Plate Thickness

* Denotes use of screw adaptor for setting of earth boss

Tired of searching for the right size and type of connector holding tool?

Why not just buy the whole kit and save yourself the headache?

lenair makes plug and receptacle holders for virtually every size and type of military standard circular connector. We even make a set of universal holding tools that work on any key position within a specific military connector series (call the factory for details). So really there is no excuse for not having the right

tool for the job when you need it. And Glenair kits provide a nice, safe storage space for your tools when they are not in use. So the next time you make up your mind to purchase connector and backshell assembly tools, why not just save yourself time and money and order a complete kit? Our operators are standing by.

Glendale, California 91201-2497

Four Reasons to Add Glenair to Your Short List of Suppliers:

First and foremost you need availability.

Are the products and components you need either in stock or able to be manufactured in a short period of time? Glenair has built its reputation on fast turnaround. We maintain the world's largest inventory of connector accessories and deliver faster turnaround on quotes and orders than anyone else in our business. Today, Glenair is changing the way the interconnect industry operates: from a long lead-time, custom order problem; to a fast response, in-stock solution. From connector accessories to fiber optic termini, Glenair is the "same-day" leader.

Second, you need capacity.

Can the supplier respond to your evolving requirements with the factory capacity and labor necessary to meet every demand—from one piece to one hundred thousand? Glenair has built the largest capacity, broadest capability factory in the interconnect accessory industry. We have the knowledge, experience and equipment necessary to handle any production requirement, no matter how large or complex, and the manpower to tackle even the most aggressive production schedules.

Third, you need convenience in ordering.

Do your current suppliers insist on quantity or dollar minimums whenever you place an order? Are their products available only from distributors with limited product knowledge and equally limited shelf stock? Is it hard to get samples when and where you need them? Do you get charged expediting fees for accelerated production? If your answer to any of these questions is yes, we encourage you to consider Glenair, where complete convenience in ordering has been a guiding principle since 1956.

Finally, you need top quality products backed by outstanding technical support.

At Glenair, we've made product quality and worldwide technical support a major part of our approach to earning your trust and loyalty. We've established an unsurpassed sales, support and engineering presence in every major market in the world. And we've designed quality into every product we ship, by applying the experience and expertise gained from over 50 years in the business.

In every respect, our formula for serving the fiber optic interconnect customer is identical to the "best-value" service model we've relied on to maintain our leadership position in our core, connector accessory business:

- Same-Day Delivery on Our Most Popular Part Numbers
- Lightning-Fast Turnaround on Quotes for Price and Delivery
- No Price or Quantity
 Minimums
- Outstanding Application Engineering and Worldwide Technical Support
