

Alarm panels Type AL8-2

- Compact Q96 design
- · Extremely easy push-button programming (no jumpers or the like)
- Individual programming of each input: - N/O or N/C, time delay, alarm inhibit, output and cable supervision
- Up to 5 units in master/slave configuration
- · Clear identification of first alarm received in case of successive alarms

Data sheet AL8-2

Application

The alarm panel AL-8 is provided with:

- · 8 alarm inputs
- 3 relay outputs: 1 output

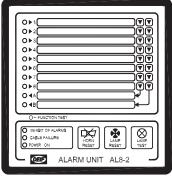

for connection of horn

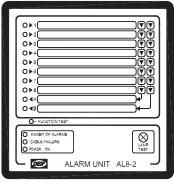

and

- 2 outputs

used for transmission of group alarms, selective disconnection of faulty equipment, etc.

The alarm panel is suitable to switchboards in industrial and marine plants for alarm and control purposes. It is CEmarked for residential, commercial and light industry plus industrial environment.

AL8-2 "Master"

AL8-2 "Slave"

The alarm panel is provided with 8 alarm inputs for connection of external mechanical alarm contacts. Alarm inputs:

These 8 inputs are individually programmable for N/O or N/C alarm contacts

The alarm inputs are individually programmable with a time delay, so that an alarm condition will not Time delay:

be registered until after the preset time.

The time delay is individually programmable by the user within the range 0..40 s in steps of 1 s.

Alarm indicators: The AL8-2 is equipped with 8 LEDs marked 1 to 8 for indication of an alarm condition for the individ-

ual alarm inputs.

When an alarm condition occurs, the LED for the relevant input chan Alarm Unit AL8-2 If more than one alarm occurs before the push-button "LAMP RESIAVE

LED will flash ahead of the others.

Alarm outputs: The alarm panel is provided with 3 relay outputs, 1 of which is used for connection to an audi-

The remaining 2 relay outputs are individually programmable by the user to follow certain alarm in-

When the relays of 1 of these 2 outputs are activated, the relevant LED marked "A" or "B" on the front will be lit constantly (red light).
